PURUS

FOR VINYL FLOORING

PRODUCT OVERVIEW | DESIGN GULLIES

THE NEXT GENERATION OF DESIGN GULLIES FOR VINYL FLOORING

More than 75 years ago, the production of plumbing products started at Purus in Sweden. This innovative family business paved the way for a new standard, which eventually led to the Purus gully. It became a new way of draining water from bathrooms and other harsh wet room environments. Since then, we have manufactured several types of floor gullies.

We are proud and grateful to still have our own manufacturing facilities in Sweden, which gives us full control over quality and delivery reliability. We have become the market leader in the Nordics thanks to extensive experience, cutting-edge expertise in technology and manufacturing, and production resources with high manufacturing capacity in plastic and stainless steel.

Quality is one of our watchwords, and it permeates our choice of materials and manufacturing. Another aspect of quality is that our production units constantly focus on minimising material waste, and ensuring that waste is recycled.

Every year we invest in improved technology and new machinery for increased productivity and product quality. All in order to offer the market attractive, durable and functional products of high quality – for now and for the next generation.

**RESILIENT DESIGN
FOR FREQUENT USE**

In homes as well as in public facilities.

NO.1 IN EUROPE

A vinyl floor can be both beautiful and practical. Purus Line Vinyl Plus gives you a design solution with good slope integrated in a hygienic, durable and easy-to-clean floor. Ideal for environments such as gyms and healthcare facilities.

Established collaborations with Europe's leading vinyl floor manufacturers enable us to develop and deliver solutions at the forefront. Our ambition is to continue to offer the best design floor gullies for vinyl flooring in Europe.

LINEAR SHOWER DRAINS

Bring your decor style into the bathroom with our linear design floor gullies. The Purus Line Vinyl Plus series provides an easy-to-clean, wear-resistant and stylish floor. The screwed clamp frame in 2 mm stainless steel provides a secure, water-proof connection. The grates' screwed locking is usually appreciated in health-care environments, as well as its softly rounded corners and no sharp edges to stand or drive on.

The Purus Line Vinyl Plus comes with a removable NOOD water trap, stainless steel clamping ring, stainless steel patterned Chess grate and a concrete installation kit. Note that the Purus Line Vinyl Plus in accordance with applicable building regulations in some markets must be installed at least 200 mm from the wall. Check what applies where the installation is to take place.

DEPOSITION

CHESS MATT BLACK

PVD PHYSICAL
VAPOUR
DEPOSITION

CHESS GOLD

The coloured gratings have been treated using PVD, Physical Vapour Deposition technology. This coating gives a highly durable surface and a long service life.

ACCESSORIES AND SPARE PARTS

Wooden joist installation kits are available to purchase separately, as well as for examples spare strainers. It is also possible to supplement with a coloured grating.

Stainless grating

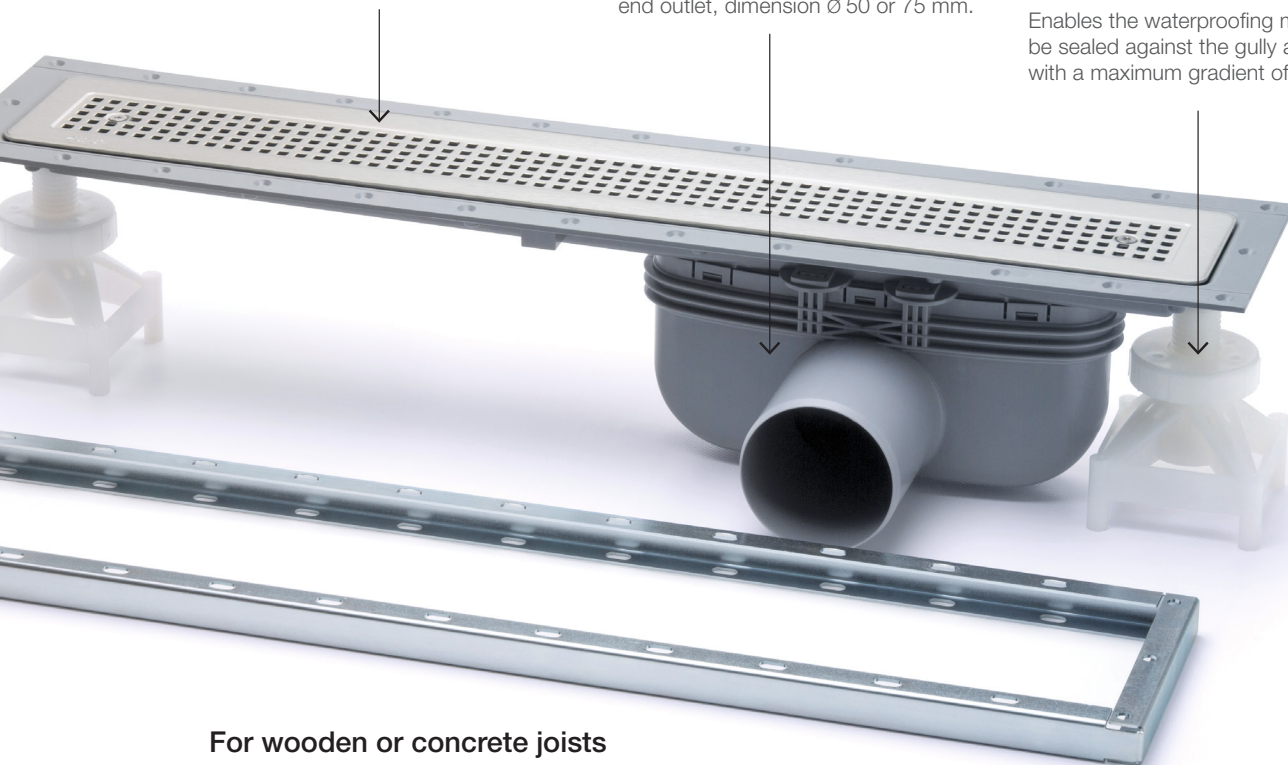

Various designs and colours, available in length versions 600, 700, 800, 900 and 1000.

Outlet

Available in different heights, side or end outlet, dimension Ø 50 or 75 mm.

Height adjustment

Enables the waterproofing membrane to be sealed against the gully at the right level with a maximum gradient of +/- 2 mm.

For wooden or concrete joists

Broad range of designs, colours etc.
For all flooring and surfaces

The included NOOD water trap is a mechanical trap which closes when there is no water flow, thus preventing any foul air from escaping through the drain.

TRADITIONAL FLOOR DRAINS

Ø130

From our wide assortment you can be quite sure to find a model that suits the requirements for your next project. We have a complete range of floor gullies for many different applications. All of them create a secure connection to the water proofing membrane and flooring material, which provides the best leakage protection, is hygienic and easy to clean with high capacity.

We always strive to facilitate the installer's work to ensure an optimal end result. For example, our proven automatic clamping ring is quick and easy to mount and secures to the water proofing membrane. We also have products with a screwed stainless steel clamping ring that can handle even homogeneous vinyl floor mats that are more than 2 mm thick.

ACCESSORIES AND SPARE PARTS

The range includes smart tools for easy and safe mounting. Purus mounting plates must be used in wooden joists. In concrete floors we recommend the Purus gully fixtures. As a rule, it is possible to upgrade your gully with a spare part, such as a new water trap or a new grating.

A BROAD RANGE OF DRAINS AND GRATINGS IN PLASTIC OR STAINLESS STEEL

Grating

Broad range of designs – choose between plastic or stainless steel.

Watertrap

Easy to lift up by the handle to clean once in a while. Often you find optional versions, e.g. in steel, available as accessories.

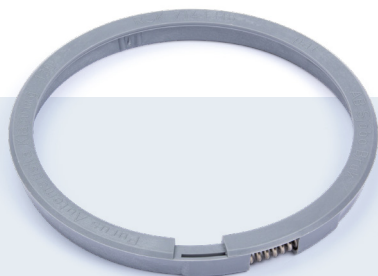

Outlet

Choose connection diameter based on the drain pipe and connection directions that fits the project. Some models have multiple inlets.

| 32 mm | 40 mm | 50 mm | 110 mm |

Clamping ring

Automatic with spring tension for a water tight installation.

To ensure a proper fit between the gully and the watersealing membrane, the Purus knife should be used to cut out the hole on gullies with automatic clamping ring. Easy to mount without the need for screws.

AUTOMATIC CLAMPING RING

TRADITIONAL FLOOR DRAINS

Ø150

Purus has a complete range of floor gullies for a wide range of indoor applications for different types of floors such as, tile floors, concrete floors, epoxy floors or vinyl floors.

Our high quality drains, whether in plastic or in stainless steel, have very high mechanical resistance and a long lifespan. Another common denominator is that they create a secure connection to the water proofing membrane and flooring material, which provides the best leakage protection, are hygienic and easy to clean with high capacity.

At www.purusinternational.com, you can download installation instructions, specifications, certificates, etc.

ACCESSORIES AND SPARE PARTS

The range includes smart tools for easy and safe mounting. Purus mounting plates must be used in wooden joists. In concrete floors we recommend the Purus gully fixtures. As a rule, it is possible to upgrade your gully with a spare part, such as a new water trap or a new grating. Maybe the one in black, recycled plastic?

A BROAD RANGE OF DRAINS AND GRATINGS IN PLASTIC OR STAINLESS STEEL

Grating

Choose between many designs in plastic or stainless steel. Some with locking device.

Watertrap

Available in plastic or stainless steel. Choose a NOOD trap for extra protection against backwater, bad smells and pests.

Outlet

The outlet position and dimension affects the flow capacity, in combination with selected water trap. Available in:

| 50 mm | 75 mm | 110 mm |

Purus unique NOOD trap, prevents odour spreading even if the water trap dries out. It's also a good protection against pests. Available on most of our gullies.

INDUSTRIAL RANGE FOR BIG FLOWS

We offer a wide commercial program with channels and drains in stainless steel. Our industrial range consists of well proven, high quality products for application in everything from commercial kitchens, hospitals or spas to workshops and industrial facilities. We manufacture custom-made draining systems according to requirement specifications regarding materials, load classes, floor types, etc.

To make it easier for you to choose a combination of the right products, we refer to our online configurator, the Channel Guide. Visit our website to find and use the Channel Guide. Select a model and configure it according to the requirements and wishes of your upcoming project.

316 STAINLESS
STEEL

All Purus channels are made of acid-proof stainless steel, quality EN 1.4404, as standard alternatively stainless steel EN 1.4301 against order. After welding in the stainless steel, our entire products (not just the weld joints) are pickled for increased durability.

Configure online in the **Channel Guide**

MADE IN SWEDEN ENDLESS POSSIBILITIES

We manufacture custom-made stainless steel channels in our own factory with long tradition of processing of stainless steel. In addition, we offer many different accessories such as water traps, filter baskets, plaster separators, sand traps, lint boxes, etc. that can be selected to your practical needs.

Grates

From barefoot-friendly grates to grids for heavy traffic.
